

Carta Nazionale dei Servizi (CNS)

Oberthur Technologies was selected at the end of 2005 by the Ministry of Innovation and Technology to be the reference provider of the CNS (National Services Card) for the Italian public administration. This pluri-annual contract calls for delivery of more than 3 million cards and for several other projects. Under this contract, Oberthur Technologies issues ID-One™ Cosmo 64K Dual Interface cards as part the Italian administration's requirements.

Oberthur Technologies provides an end-to-end ID solution which includes smart card manufacturing, electrical and graphical personalization, fulfillment and delivery to citizens. Additionally, all smart card products provided by Oberthur Technologies to the Italian market are Common Criteria certified to EAL4+ level according to the SSCD (Secure Signature Creation Device) Protection Profile.
