

Carte DUO

French Healthcare Insurance Card

SUCCESS
STORY

The FFSA, the association of the major French private insurance companies (GAN, GROUPAMA, MMA, AXA, AMIS, AVIVA, AZUR, SOGAREP) has launched a large scale pilot of insurance cards named 'Cartes DUO'.

Oberthur Technologies—through its Card Systems division—has been chosen as the sole card supplier and personalizer to deploy this nationwide supplementary health insurance card. Oberthur Technologies has provided comprehensive support to the FFSA in order to successfully implement this complex and ambitious project.

The DUO card is based on SESAM-Vitale 1 and proposes the same services, for example cost insurance reimbursements and storage of personal information on patients and relatives. This smart card is fully integrated in the existing French healthcare system. Used in association with the Vitale card, the DUO card allows the payment of medicines to be made in accordance with a patient's private health insurance contract.

Key features

- A one-year pilot of 140,000 smart cards
- Deployment in 6 French departments
- Integrated within the SESAM-Vitale Network
- Directly delivered to the cardholder
- Functionalities:
 - Cost Insurance reimbursement
 - Personal Information Storage
 - Authentication
 - Insurance administration
